- ✓ **HEAVY DUTY DEEP RIB SHEET .35MM GAUGE**
- ✓ **EXTRA HEAVY DUTY 0.47MM GAUGE CORRUGATED SHEET**
- ✓ **OPTIONAL UPGRADE TO WELDED STEEL FRAME WORKSHED**
- ✓ **LEADING PAINT SYSTEM FORMULATED FOR AUSTRALIAN CONDITIONS**
- ✓ **LOCALLY BUILT TO YOUR REQUIREMENTS**

WHY CHOOSE US??

THE SteelChief DIFFERENCE

SMALL SHEDS. BIG IDEAS.

STEELCHIEF - GREAT VALUE & GREAT ADVANTAGES!

1. All of our products are locally made in Ballarat to your requirements.
2. SteelChief sheds are a great DIY product - all shed panels are pre-assembled making your installation simple and safe.
3. Select your SteelChief product size and colour then select any of our additional optional extras. Decide on door type and positioning then build your shed exactly the way you want it. Delivery of your product will usually be within two weeks in panel form with rolled safety edges on all sheets ensuring you an excellent finished project with the minimum installation effort.

GUARANTEE

SteelChief guarantees all workmanship of our products. Our current suppliers of pre-painted coloured and zinc sheeting have warranted that their products are resistant to flaking peeling and excessive fade or perforation for 15 years under certain conditions. The warranties are given subject to our suppliers' standard warranty terms which can be found online. We will pass on to our suppliers any material warranty claim but SteelChief will not itself be liable to meet any such claim. SteelChief may without notice change suppliers and/or materials which may alter warranty terms.

IMPORTANT NOTE

- It is important to share full details about your Shed site so we can determine wind classifications.
- If in doubt about the suitability of a SteelChief product for your site please consult your local civil engineer.
- Prices are current from 1st October 2023. This recommended price list replaces all other SteelChief pricing information and is subject to change without notice.
- All sizes shown are actual external wall dimensions. Roofs will overhang the walls in some directions. All measurements stated by SteelChief are nominal (or approximate) and may vary slightly from product to product. Please advise your distributor of any important dimensional requirements.
- SteelChief products are not watertight. For improved water resistance we recommend a rebated concrete floor, our rebated wooden floor option or sheeting running past floor level on a flat concrete slab.

KEEPING THINGS SIMPLE WITH EASY DIY

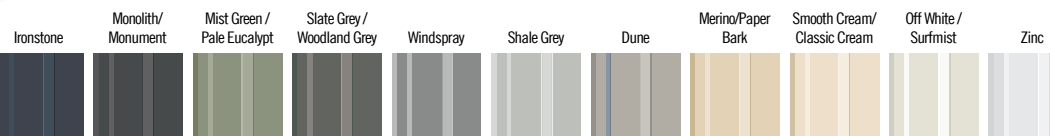

That's why all of our products come in pre-assembled panels so if you are the Do-It-Yourself kind of person upon delivery of your new SteelChief product all you need to do is screw the panels together using a cordless drill. Be sure to attach your product to the ground immediately to ensure no wind damage occurs. Instructions on assembly can be obtained from your nearest distributor or just visit us at www.steelchief.com.au to download a full step-by-step guide.

COLOUR

At SteelChief we let you be as creative with colour as you like. Mix and match any of our 10 colours for walls, door and roof.

Please note: the colours below and in the example pictures are approximate shades only and should not be used for colour matching. Visit your distributor to view actual colour samples.

HIGHER WIND LOADINGS!

All SteelChief sheds are engineered to windclass N3

(Subject to correct installation of the shed)

WHY STEELCHIEF? Get more with SteelChief

BaseSmart® Technology

BaseSmart® Technology prevents debris build-up, ensures a clean, corrosion-resistant shed.

Heavier Gauge Steel

Australian standards, 0.35mm thick steel for durability, or corrugated sheeting for additional strength.

Designed & Manufactured in Australia

Choose SteelChief for local expertise and Australian-built sheds tailored to our conditions.

Easiest DIY Shed on the Market

Effortless DIY with pre-assembled walls & roofs. Superior strength, no cardboard boxes.

Custom Designs & Sizes

Need a shed for a narrow or odd-shaped space? Custom solutions to fit your needs perfectly.

N3 Wind Rating

N3 wind-rating suits most sites. Upgraded site specific design available for more exposed sites. Sheds must be secured to concrete slab. See Page 7.

One expert team for PERSONAL SERVICE, ON SITE QUOTES, CONCRETING, INSTALLATION

A shed company that makes the experience of getting your new shed hassle-free. A free on site design consultation.

SHED BASE FLOORING OPTIONS

Concrete (Flat or Sloping site)

Timber floor (Flat site)

Sub-floor (Sloping site)

OPTIONAL INSTALLATION

Available in most cities and some regional areas. Check with our sales team regarding availability.

- Our team delivers and installs your shed.
- Includes bolting to your slab or using star pickets if suitable (wind protected area).
- Site preparation and concreting available.
- Wooden floors and sub-floors (sloping sites) also available.
- Repairs and maintenance to our sheds.
- Optional internal silicon seal of shed to clean flat concrete slab. Owner can also do this task.

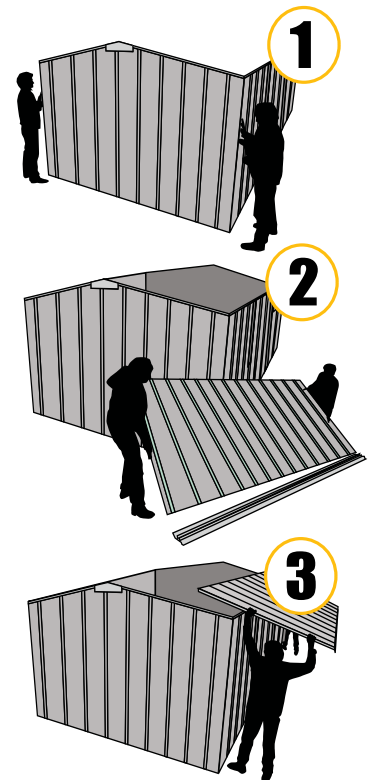

BUILDING PERMITS

If your shed is larger than 10m² Victoria, 15m² South Australia, 20m² NSW, it may need a permit. You can check with your local council or just ask us and we can find out for you, and then obtain the permit on your behalf. For a full list of steps to ensure a successful project discuss with our sales team.

CONCRETE FLOORS

Concrete floors are a great shed base option. Allow the concrete to dry for forty-eight hours before using the shed! Slab size depends on shed type and slab design. Discuss with our sales team. Unless you have some concreting experience, or a qualified friend who does, we do not recommend doing the concreting yourself. A mistake made can often be very expensive, and difficult to rectify. Let the Steel Chief team take the hassle out and do it for you.

NOTE: Concrete Slabs will emit water vapour which will cause boxes and soft items to become wet. Always store valuable items off the concrete.

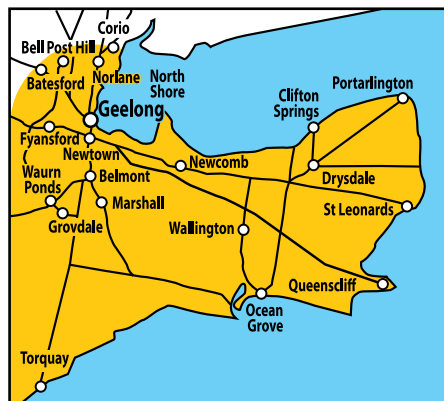

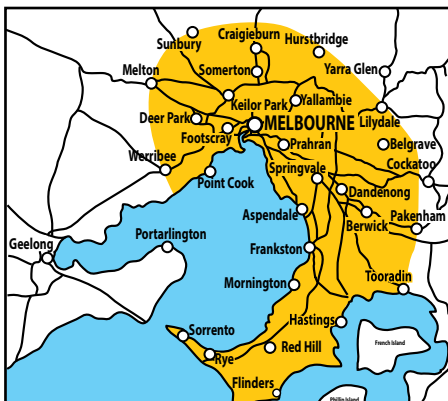

Sheds supplied as
Pre-Assembled panels.
EASY DIY

STEELCHIEF LOCATIONS

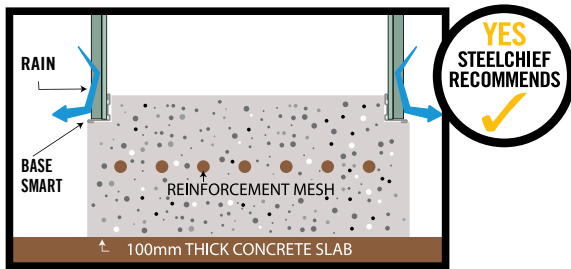

Please see maps for delivery zones in these areas. Please request a quote for delivery if you are located outside of these delivery zones on Ph: (03) 5334 1954.

* Delivery conditions. Delivery applies to Sheds, Aviaries, and Forts delivered to homes in these areas - **Victoria:** Metro Melbourne, Geelong, Ballarat and Bendigo. **SA:** Metro Adelaide.

Call us now for expert advice. VISIT www.steelchief.com.au

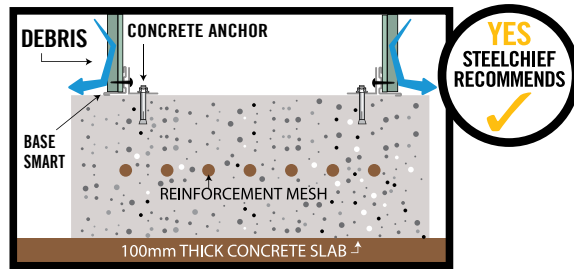

CONCRETE FLOORS

REBATED CONCRETE SLAB (HIGH WATER TIGHTNESS)

The finished slab size is the same size as the shed. Excellent water seal.

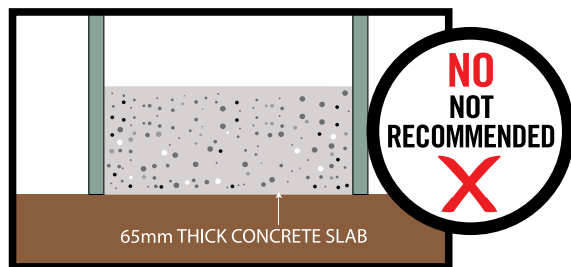

- Concrete and shed installation completed same day
- Suitable for relatively flat sites
- If site has significant fall then a flat slab maybe best
- Difficult DIY installation.

FLAT CONCRETE SLAB (Recommend internal silicon seal)

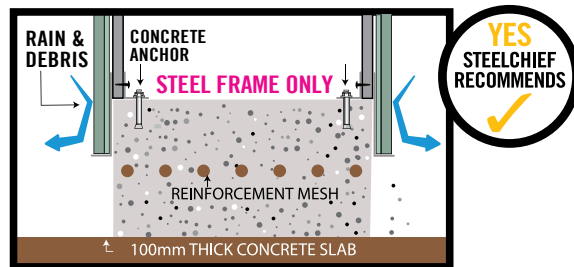

The shed is bolted to the flat slab. In this option you may want to seal around the base of the shed. Note: The silicone seal around the shed base is usually good but in some circumstances it can leak water.

- Recommended internal silicon seal by owner or request a quote
- Suitable for flat and sites with a fall
- Slab poured then shed installed at a later date
- Easy DIY installation of the shed.

INFILL POUR SLAB

- Concrete flows inside ribs and voids sheet warranty. Premature corrosion may occur
- Damaged shed usually requires concrete floor to be removed and replaced. Very expensive.
- Loss of 65m m headroom.

SHEETING RUNS PAST FLOOR LEVEL ON FLAT SLAB (BEST WATER TIGHTNESS)

The welded frame of the Shed is bolted to the slab and the sheets run past the slab to ensure no water or debris comes under the walls.

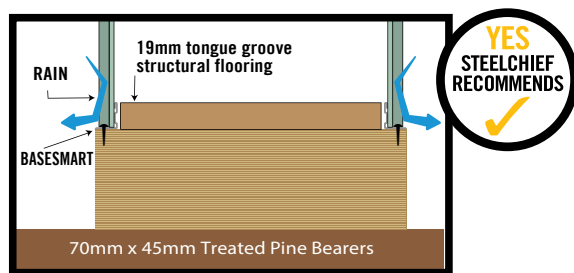

- Suitable only for Steel frame sheds
- Works well for unlevel areas
- Shed supplied with clips and dyna bolts to fix shed to slab
- Easy DIY installation of the shed.
- Also suits installation on existing flat slabs.

TIMBER FLOORS

REBATED WOODEN FLOORS (HIGH WATER TIGHTNESS)

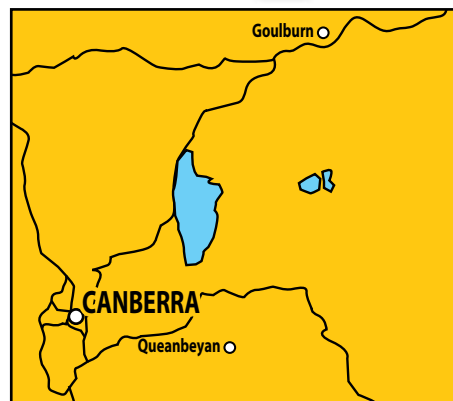

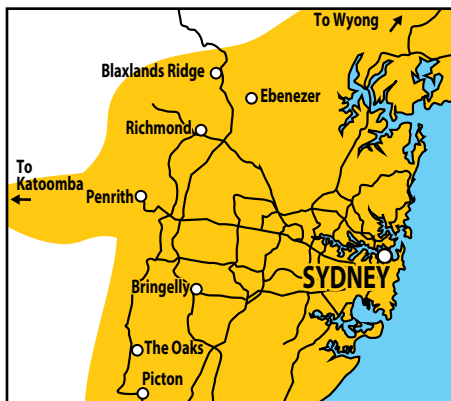

A rebated wooden floor offers excellent water seal at the base of the shed and strong attachment to the ground. Whilst the wooden floors are simple and effective, we do not have engineering specifications and computations for them and as such, they are not suitable for cases where a permit is required.

- Small Sheds may need to be star picketed to the ground.
- Easy DIY product. 19mm particleboard flooring and treated pine bearers cut to size.
- Easily dismantled for relocation.
- Easy DIY

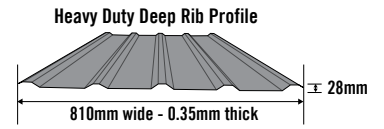

NSW: Metro Sydney, Wollongong, Central Coast, South Coast. ACT: Canberra.

WIND SPEED EXAMPLES

Choosing your Shed for your site.

THINGS TO CONSIDER:

Using the table below consider where your space fits into the chart below. At SteelChief Sheds are all rated at N3. We do recommend our stronger Steel Frame Sheds for N3 sites. We can engineer custom sheds to suit more extreme N4 sites. Please discuss your site with our sales team.

3.86	\$5,228	\$5,736	\$5,167	\$5,728

Standard includes roller door width to suit front length - see notes wall height of 2410mm/2360mm

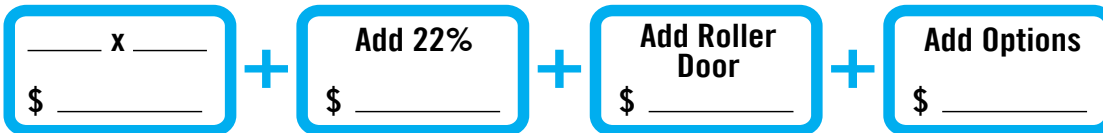

Roller door openings:

- 1800mm W x 1950mm H (2.35m front)
- 2400mm W x 1950mm H (3.12m front)
- 3000mm W x 1950mm H (3.89m front)

NOTE: Roller Door Storage Shed must be attached at the base to a 100mm reinforced concrete foundation using 6.5mm diameter sleeve anchors in all anchor brackets.

ROLLER DOOR SHED PRICE CALCULATOR

Find the size shed you want and get the price from pages 12 or 13

For 600mm extra wall height required on all Roller Door Storage Sheds

Select roller door width
1.8m width add \$965
2.4m width add \$1065
3.0m width add \$1435

Add other options from page 22-23

Comes as Standard with Extra Strong Welded Steel Frame Construction

HEAVY DUTY DEEP RIB WITH STEEL FRAME

All steel frame sheds are supplied as pre-assembled wall and roof panels

Sheet fixed to frame using Aircraft grade Aluminium rivets as standard to all sheds

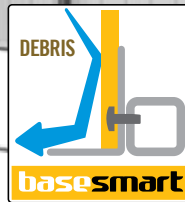

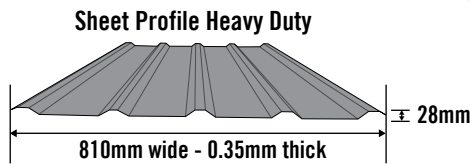

PA Doors & Door opening fully welded RHS, with heavy duty hinges

Roof bars to sheds over 3.12m gable span

Steel mounting plates for roller door models

Full height portal with hold down brackets for shed over 3.86m in length

Steel frame sheds feature a strong Galvanised 25 x 25mm RHS steel frame, fully MIG welded

SHOVEL/BROOM RACK:

Hooks over wall

300mm arms \$59

CUSTOM SHED SIZING:

See page 4 for custom sizes

Custom roof \$60

DIY WOODEN FLOORING SYSTEM - CHEAPER & EASIER THAN REBATED CONCRETE!

This flooring system is simple fast great value and easy to relocate. A rebated wooden floor offers excellent water seal at the base of the shed and strong attachment to the ground.

	Side/Gable	0.81	1.58	2.35	3.12	3.89
Front	0.81	\$149	\$215	\$275	\$379	\$445
	1.58	\$215	\$369	\$455	\$575	\$685
	2.35	\$275	\$455	\$589	\$745	\$879
	3.12	\$379	\$585	\$799	\$989	
	3.89	\$455	\$709	\$989		

Whilst the wooden floors are simple and effective we do not have engineering specifications and computations for them and as such they are not suitable for cases where a permit is required.

Supplied as pre cut sheets of 19mm particle board flooring and 70 x 45mm treated pine bearers cut to length. Simply lay bearers onto the prepared (flat) site and screw or nail down flooring. Erect shed onto bearers so floor is rebated inside your shed. Then attach your shed to bearers through the Basesmart.

INSIST on SteelChief

The only Shed with Basesmart Technology!

- Eliminate unsightly trapped debris
- Eliminate premature corrosion
- Higher wind rating

Custom design?

Yes, we can customise your shed, its shape, exact dimensions, door and window position, skylights, shelves, colours and styles...tell us what you want

Think outside the box?

No difficult instructions and a box of bits. Insist on a better shed! SteelChief sheds come as quality pre-assembled panels, MAKING IT AS EASY AS 1, 2, 3.

Installation and Concrete?

Yes, SteelChief can install your shed and if required, site preparation, concreting and permits. Contact us to find out if this service is available in your area.
